Saif Chamakhi

UNITY DEVELOPER | GAMEPLAY, UI SYSTEMS & MULTIPLAYER

Tunis, Tunisia | +216 52 099 160 | chamakhiseif@gmail.com
Portfolio & case studies | LinkedIn | GitHub

I build gameplay systems, UI architecture, and multiplayer features in Unity for PC, mobile, and WebGL. My work spans commercial releases, studio frameworks, and playable prototypes. Full-time or contract | Remote on EU/GMT hours.

CORE TOOLKIT

Gameplay & architecture: Unity, C#, event-driven systems, ScriptableObjects, state machines, Minimax / Alpha-Beta

UI & multiplayer: Unity UI / Canvas, reusable interfaces, Photon Fusion, Photon Quantum, WebGL

Performance & delivery: Unity Profiler, Addressables, texture compression, Android, Steam, Git, REST APIs

PROFESSIONAL EXPERIENCE

StolenPad
2026 - Present

Unity Developer

- Built 5+ hypercasual prototypes from concept to playable build under rapid iteration cycles, owning gameplay systems, UI, and release readiness solo on most builds. Several are now being pitched to publishers.
- Restored and republished a back catalogue of 20+ legacy titles, fixing breaking issues and meeting current store requirements to make the catalogue viable for publisher acquisition.
- Cut build sizes for web and mobile using texture compression, profiling-led code optimisation, and Addressables, meeting platform limits without cutting content.

BNJMO
Feb 2025 - Feb 2026

Unity Developer

- Authored the studio's shared framework covering the audio system, announcement system, event-driven layer, and UI transition utilities.
- Distributed it via Git submodules and reused it across Tikto King, Maleficus, multiple client projects, and the studio website, removing repeated setup work on every new project.
- Delivered gameplay architecture, AI, and scalable UI on Maleficus, Tikto King, and Super One.

Blue Gravity Studios
Nov 2023 - Sep 2024

Game Developer

- Owned the UI layer on Draft Fever Bowl within a 20+ person Steam production, including a responsive popup framework reused team-wide.
- Integrated Photon Fusion multiplayer and optimised WebGL performance on The Plooshies.
- Built progression systems and early UI on Albert's Ark Idle through to Steam release.

READY TO TEK
Feb 2023 - Nov 2023

Game Developer

- Owned UI, gameplay mechanics, and backend integration on The Amazing SaniBoy through its Google Play release. The game reached 100,000+ downloads and a 4.7-star rating.
- Implemented the in-game store data layer and integrated Google Play services, ads, and leaderboards.

Public releases: The Amazing SaniBoy | Albert's Ark Idle

EDUCATION & LANGUAGES

Bachelor's in Video Game Development | ISAMM, Manouba | 2019-2022
Arabic - Native | English - Professional | French - Fluent
